New York  
New England  
Canada

Connecting South and West

*Featuring Natural Wonders  
and  
Select Resorts*

*Price Fifty Cents*

**IT PROTECTS YOU—**

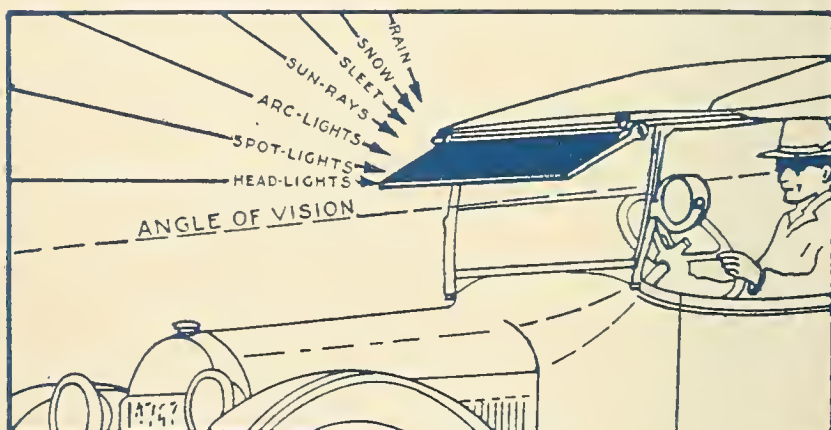

**At a Trifling Cost**

—from the *Dangers of Driving at Night*, shielding your eyes from the blinding glare of high-powered headlights, spot-lights, arc-lights, electric signs, etc.

—from the accumulation of *Rain, Snow and Sleet* upon your windshield, which obstructs your vision of pedestrians, vehicles, etc.

—from *Sun Glare* and *Road Glare* and consequent tired, dazzled eyes and over-burdened nerves.

—from “*Driver’s Headache*” and the “*Automobile Stare*”—and adds immeasurably to the safety and comfort of yourself and your passengers.

Adjustable for any angle. Made for open and closed cars.  
Steel frame—Fabric leather cover.

“SIMPLEX” Model, 10" x 40" ..... Price \$ 7.00

“DE LUXE” Model, 10" x 38", 40", 42" and 44" Price \$14.00

**SPECIAL OFFER:** Send us remittance together with the *name, year* and *model* of your car and we will send you a RAMSEY-VISOR. Try it for five days and if you are not perfectly satisfied return it to us and we will refund your money.

Manufactured by

**THE ALBANY MACHINE & TOOL CO.**

# The MASON TRACTION PLATE

Bottom View

Top View

For trucks and pleasure cars when stuck in mud, snow or ice  
No jacks needed, not fastened, simply placed in front of wheels

## USED TO

- Gain traction for wheels
- Mount curb or other obstruction
- Rest jack or in soft earth or snow
- Get front wheels out of track or rut
- Dig ice, snow or earth from in front of wheels

*When your wheels slip and you can't  
get a start, use a Mason Traction Plate*

For pleasure cars and light busses \$8.00 per pair

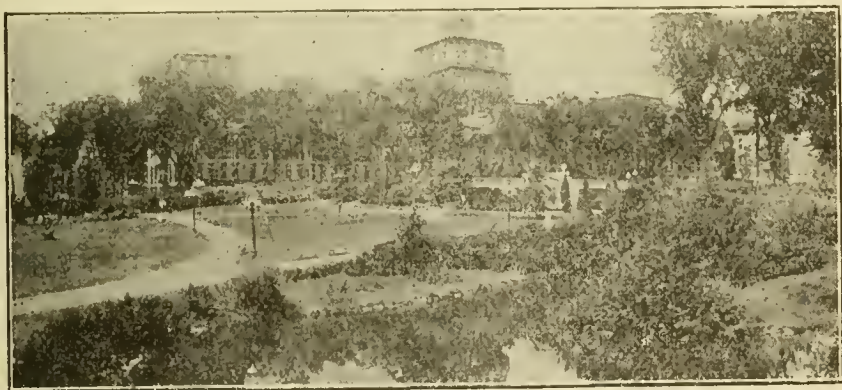

*Write for Dealers and Jobbers Prices*

Manufactured by **WM. C. MASON**

## **HEALTH AND PLEASURE**

The people of this State now own nearly five hundred thousand automobiles. And the work of investing in motor cars goes bravely on. More automobiles mean more time spent in healthful outdoor existence, more economy and celerity in transportation, more good roads and more comfort and happiness generally. So more power to the horseless vehicle!

### **KEEP A RECORD OF GASOLINE**

In Keeping any record, it is obvious Some rules must govern procedure. The above are submitted as necessary.

**It Will Be Understood** that the **Full Tank** is necessary to start and continue the record. The **Full Tank** positively determines the **Amount of Consumption for Mileage Obtained**. It is not always possible to determine this otherwise.

**Explanation:** Assume that your brand of gasoline is used; that the record is started January 10th; that the motor tank holds, **Full**, twenty gallons—

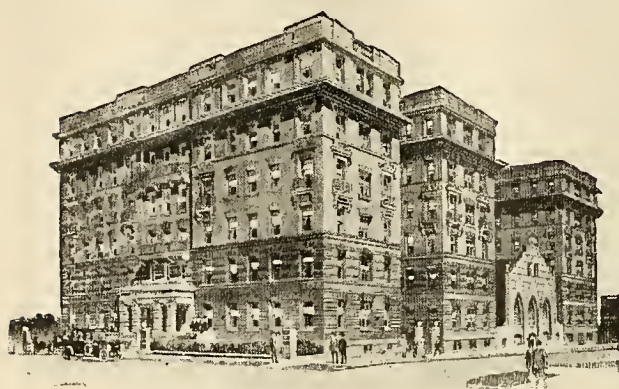

Fill the tank with whatever amount is necessary to do so and enter 20 against January 10th. Also the **Odometer Reading** which is assumed to be 3520.

January 12th it is necessary to refill and 12 gallons is required to do this. Enter 12 against January 12th, also **Odometer Reading** which is shown to be 3850. By deducting the reading of January 10th (3520) from that of January 12th (3700) 180 miles is determined as the mileage on the 12 gallons consumed, or 15 miles to the gallon, as **Shown by the amount Just Pumped**.

Keep a record monthly to show condition of your motor.

## SAFETY DON'TS FOR MOTORISTS

Don't forget to slow down at street or road intersections. may save a human life.

Don't forget to look to the right and the left before crossing a railroad crossing.

Don't forget, when signaled by a vehicle in your rear, to turn slightly to the right and allow such vehicle to pass you on your left.

Don't forget the pedestrians. They, too, have rights on the streets and highways.

Don't forget that all motor vehicles must be equipped with adequate brakes in good working order and adequate horns and other signaling devices.

Don't forget that in case of accident, you must stop immediately and give your name, address and license number to the injured party or a police officer. If no police officer in the vicinity or the place of injury or accident, report the same to the nearest police station or judicial officer.

## Binghamton Motor Car Company, Inc.

*(Official Garage for Hotel Bennett)*

195-199 WATER ST. BINGHAMTON, N. Y.

### USE PLENTY OF OIL AND GREASE

The pleasure to be derived from automobiling, the safety of the occupants of the car, the saving of hundreds of dollars to every owner, the keeping of appointments, all depend upon proper use of oil and grease.

#### Lubricating System:

Proper Lubrication is more important than any other one item. Many times troubles of a motor car can be traced to lack of lubrication or the use of an inferior lubricant.

No Definite Rule can be followed as to the use of lubricants. These depend entirely upon conditions; naturally, the more the car is used, the more it should be lubricated.

#### Schedule of Lubrication:

Every 100 Miles—Give grease cups a turn or two on springs, rear axle bearings, fans, foot-brake connections, steering knuckles, steering connection, clutch, any about engine. Inspect crank case oil gauge for proper level of oil.

Every 500 Miles—Speedometer shaft, universal joint, self-starter bearings, spark throttle control, generator bearings, and drive steering column.

Every 1,000 Miles—Screw down all grease cups and refill on springs (also between the leaves), wheel bearings, transmission, magneto, steering gear case, clutch, differential, rear axle.

Every 2,000 Miles—Drain crank case when engine is hot, allowing engine to run a moment to thoroughly cleanse itself

Do not flush out with kerosene as it's impossible in most engines to get the kerosene all out.

Refill with fresh lubricant to proper level.

Drain transmission and thoroughly cleanse with kerosene. Refill with fresh lubricant to proper level.

Drain rear axle and differential and thoroughly cleanse with kerosene. Refill with fresh lubricant to proper level.

## **Albany to Binghamton, N. Y., 151.7 Miles**

## **WHAT THE AUTOMOBILE CLUBS OF NEW YORK STATE HAVE ACCOMPLISHED**

- 1—They have exposed and prevented the operation of questionable accessory and tire concerns.
- 2—Were the first to urge the building of good roads in New York State, and our 8,000 miles of paved highways are largely the result of co-operation by the New York State Automobile Clubs.
- 3—They have secured reciprocity in Motor Licenses between this and other states, including Canada.
- 4—As custodians of the interests of the motorists of the State, have continuously fought without hesitancy any unfair legislation, with the result that not one single law among the hundreds affecting the motorist, introduced each session, has ever passed in the last ten years when opposed by the New York State Automobile Clubs, with one exception.

## **Elmira to Binghamton, N. Y., 59 Miles**

## LUBRICANT FOR SPRINGS

In lubricating automobile springs the greatest trouble is found in keeping the lubricant from being squeezed out under pressure. A compound that obviates this is found in graphite and beeswax mixed to a paste and spread upon each leaf. Obviously, the spring must be taken apart to apply this lubricant.

## AUTOMOBILE CLUBS

5—Have promoted and enacted into law, Uniform Traffic Regulations, the Anti-Glare Headlight Law, and devoted their best efforts to the creation of the State Police.

6—Have saved the motorists of the State in the last three years alone, SEVEN MILLION DOLLARS.

7—Have made it possible to operate an automobile in New York State on better roads and at less cost than any other State in the Union.

8—Have kept the motorists informed of all measures introduced at Albany, affecting their interests, kept them informed as to road conditions, and all other matters of interest to them.

---

### TROUBLE RULES FOR TROUBLESOME AUTOMOBILES

1. Gasoline—Is tank full? Are pipes clean? Is gasoline clean? Is carburetor clean? If carburetor needs adjusting do it, otherwise leave it alone. Does manifold leak?

2. Compression—To test: Open all petcocks except the one on cylinder to be tested; crank engine, noticing how strong the compression is in each cylinder.

3. Ignition—A. Test for a spark by taking wire off any plug; hold wire about  $\frac{1}{8}$  of an inch from plug; crank engine with switch on. Spark should jump to plug.

B. Are the batteries run down? Does the vibrator (if any) buzz? Is the timer clean? Do timer points make good contact?

C. Are any wires loose, burned, wet, broken or short circuited? Are spark plugs clean and are points 1-50 of an inch apart?

D. Does magneto armature revolve? Is safety spark gap clean? Are interrupter points clean and adjusted right? Do all brushes make good contact? Is distributor clean? Is distributor motor loose, broken, or making poor contact?

Loose wires and terminals and neglected batteries cause much trouble.

Put distilled water in your batteries every two to four weeks.

## **Pittsfield, Mass., to Rutland, Vt., 96.6 Miles**

### **CASTOR OIL ON EYELASHES**

Every motor car rider has experienced the discomfort of dust in the eyes, and also from the effects of cold winds. A suggestion has been made that these discomforts may be greatly alleviated by applying castor oil along the eyelashes. This, it is claimed, will catch most of the dust before it can enter the eye, and also it protects the eyes from the chilling effects of the wind.

## **Rutland, Vt., to Pittsfield, Mass., 96.6 Miles**

## TROUBLES AND THEIR SOURCES

**A Great Deal** of time is wasted by many motorists when car develops trouble, by not giving sufficient thought, if any, to the symptoms shown from the time trouble was first noticed to the time an attempt is made to set matters in order. Diagnosing automobile troubles requires thought and reason.

**Never Tamper with** or destroy the arrangement of parts of the engine or car unless fully satisfied of the real trouble. Note the symptoms and endeavor to discover the seat of the disturbance. If not successful in this see the nearest dealer or some one qualified by experience and have, whatever needs attention adjusted in a correct manner.

**Make It a Point** to understand the car thoroughly. Remember when diagnosing trouble there are two essentials necessary—first, gasoline; second, a spark.

**Gasoline**, in vapor form, must reach the inside of the cylinders and the spark must be there at the proper time to ignite the gas. If you have both, something is bound to happen, even though it is but a single explosion. Bear in mind that even though there be gasoline and spark, the engine will not run properly unless the cylinders receive the gas mixed in the correct proportion with air.

**Remember** that if an engine is not properly lubricated and cooled, it will heat.

**In Summing Up** the chief troubles it is found that most all are due to **Ignition, Carburetion and Lubrication**.

If trouble occurs, find out which is responsible.

**Listed Below** is a summary of troubles and their causes.

**Engine Fails to Start:** Gasoline exhausted; mixture too lean; water in gasoline; supply shut off; water in carburetor; carburetor frozen (winter); switch off; dry cells or battery weak or not properly connected.

**Engine Runs Irregularly (Missing):** Usually ignition, caused by (a) dirty spark plugs, (b) improper gap in spark plugs, (c) broken porcelain in spark plugs; poor compression; leaky intake manifold; bad mixture; valves set too high or too low; valve sticking.

**Engine Stops Suddenly:** Usually ignition; water or dirt in gasoline; overheated—lack of oil or water; gasoline tank empty (usually causes engine to stop gradually).

**Overheating:** Lack of oil or water; loose fan belt; carbon; spark retarded; mixture too rich; sediment in radiator.

**Engine Knocks:** Carbon; overheating; loose connecting rod or wrist pin; broken piston ring; spark too far advanced.

**Engine Hisses While Running:** Spark plug porcelain broken; exhaust pipe cracked or joint loose; spark plug loose in cylinder.

**Excessive Smoke from Muffler:** Over-lubrication (blue smoke); mixture too rich (black smoke).

**Lack of Power:** Loss of compression; carburetor flooding; weak ignition; lack of oil or water; brakes dragging; flat tires; lack of gasoline (if line is stopped motor will spit back through carburetor with throttle open).

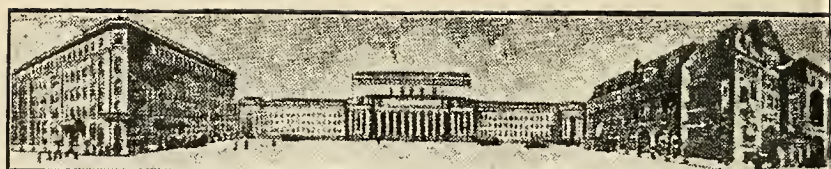

**Back Firing (Through Carburetor):** Intake valve or exhaust valve holding open.

**Engine Spits Back Through Carburetor:** (Erroneously called "backfiring.") This usually indicates too weak a mixture and may be caused by—Carburetor adjusted for too much air and too little gas; dirt in gasoline passage or nozzle; air leak around intake to carburetor.

**Gasoline Record:** The Average Motorist confines himself to one brand of gasoline believing that he obtains maximum efficiency.

**A Simple Method** of gasoline accounting that shows actual results.

**Do This:** Fill Motor Tank Full First. Fill tank Full whenever a pumping is made. Always Make Record at time of refilling.

## VICTORIA GARAGE

60 Stanley Street - Montreal

Rear Windsor Hotel—Three blocks from Queen—Two blocks from Ritz-Carlton

*Storage 300 cars, on the level*

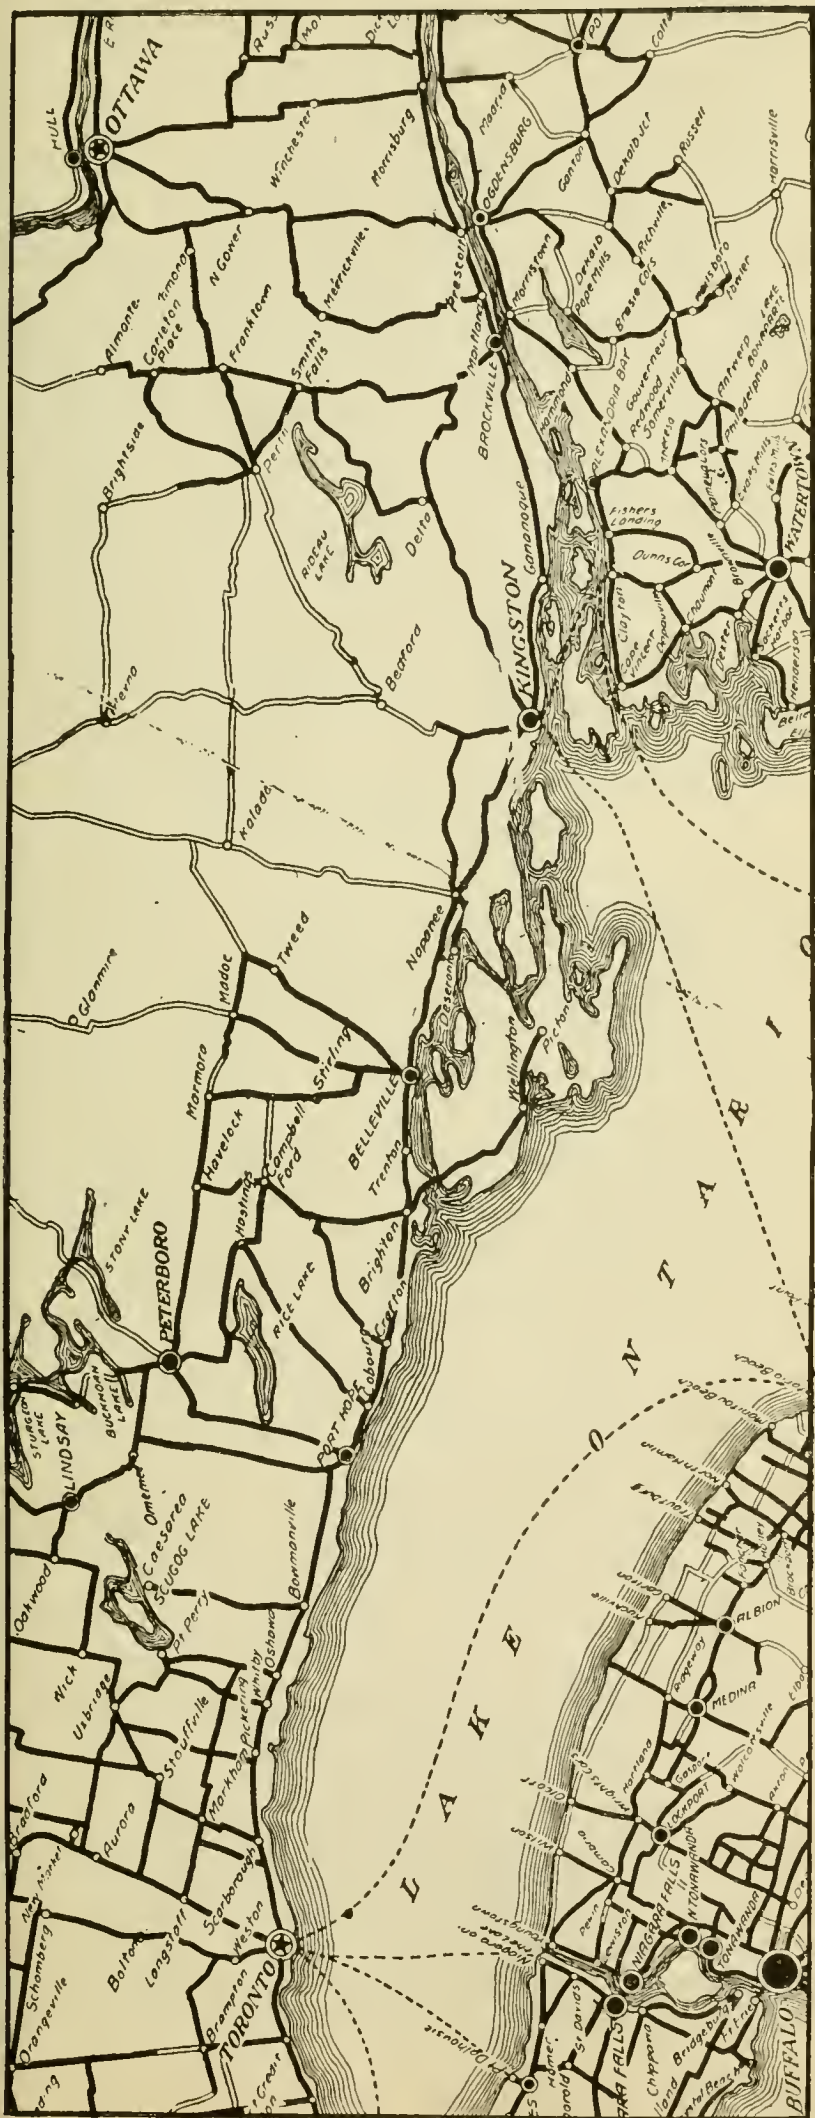

---

### KEEP MUFFLER CUT-OUTS CLOSED

Horns are intended for protection and not for amusement. Use them with intelligence.

Do not turn from a parked position into the traveled highway without first looking to the rear for following traffic.

Speed means serious and even fatal accidents, increased tire and repair expense, nervous prostration and loss of money, time and pleasant disposition.

## **Montreal to Kingston, Ont., 195.3 Miles**

### TO KEEP OUT OF TROUBLE

Use chains when pavements are slippery.

Test your brakes frequently.

Don't use glaring headlights in the streets of the city.

When approaching an automobile at night, coming in an  
opposite direction, slow down and dim your headlights.

46.2 Right fork, thru Hallstead 48.5; Great Bend 49.  
59.0 Left fork, Court st. to City Hall, Binghamton; 63.7.

## TOURISTS REQUIRE NO BOND

It is not now necessary for American tourists to obtain a custom bond before entering Canada, provided the entry is for pleasure purposes only, and not over ten days. All that is required is that an application be made at the Collector of the Port of Entry for a Ten-Day Permit to tour Canada.

If a longer stay than ten days is planned and not more than six months, a bond for double the value of the Car must be given. A bond may be obtained at Port of Entry upon payment of a fee of \$5.00—no other expenses necessary. This bond is only required when the visit in Canada exceeds ten days.

## TIMELY SUGGESTIONS

Never under any circumstances drive fast when approaching or passing a school.

When unable to see what is ahead of you at any time, slow down.

Upon a signal from another driver approaching from the rear at a reasonable speed, pull over to the extreme right and allow him to pass. The law compels you—courtesy demands it.

Spasmodic spurts of speed are dangerous.

## The Sign of a Good Printer

*Believe in signs?* 

Tell them that you saw it in Motor Tours
